re planetary quarantine
policy.

Thank you for your generous
unclassified remarks in "Cosmic
Alchemy".

A small point - before a new
myth is started - (and in-
consistent with your very care-
ful scholarship on more
central matters.)

On p344 you have confused
my position on quarantining
Mars with the moon.

I did also ask that the moon
be protected from confusing
introductions from earth;
and the need for that is certainly
muted if not still by what
we now know of regolith
formation on the moon.

Sincerely,

Joshua Lederberg
